PROFESSIONAL SUMMARY

- ML/AI engineer who has shipped 6+ production applications, including a fine-tuned document-extraction model (LayoutLMv3) reaching 91%+ accuracy in a live FastAPI microservice. Led a team of 2 to deliver an AI hackathon project in 48 hours, and cut meeting-summary turnaround by over 95% (from 60 minutes to under 2 minutes) by designing an async LLM pipeline (Groq/Llama 3). Collaborates directly with stakeholders to analyze model trade-offs and document evaluation results. Codeforces Specialist, 800+ DSA problems solved.

EDUCATION

Indian Institute of Information Technology Ranchi

Bachelor of Technology in Computer Science and Engineering

2024 – 2028

CGPA: 8.74

WORK EXPERIENCE

Freelance Full-Stack Developer

June 2026 – Aug 2026

Client: Zidio Development

Remote

- Communicated directly with the client to gather requirements for IntellMeet ([GitHub](#) | [Live Demo](#)), a real-time meeting collaboration platform, and translated needs into a technical specification
- Designed and owned an async LLM pipeline (BullMQ, Redis, Llama 3 via Groq) generating meeting summaries, decisions, and action items for a 60-minute meeting in under 2 minutes; analyzed failure modes and implemented retry-with-backoff and graceful fallback on API failure
- Implemented JWT auth, OTP login, and a server-enforced 4-tier RBAC approval flow (Guest/Member/Host/Admin) powering the real-time collaboration backend, documenting the access model for client review

PROJECTS

DocuParse AI – AI-Powered Document Extraction Platform

June 2026

Python, FastAPI, PyTorch, LayoutLMv3, Node.js, Express, TypeScript, PostgreSQL, BullMQ, Redis, JWT – [GitHub](#) | [Live Demo](#)

- Fine-tuned a LayoutLMv3 model on 949 documents, analyzing extraction errors across iterations to reach 91%+ field-extraction accuracy, and served it via a Python/FastAPI microservice processing 20 documents/min end-to-end
- Designed and built a TypeScript/Node.js REST API layer with JWT auth and an async BullMQ/Redis job queue in front of the extraction service, decoupling ingestion from inference

PropPredict – Real Estate Price Prediction Platform

May 2026

TypeScript, Python, FastAPI, Scikit-Learn, PostgreSQL, SQL, Docker Compose, REST API – [GitHub](#) | [Live Demo](#)

- Designed a relational PostgreSQL schema and SQL logic behind 10+ RESTful endpoints
- Analyzed and compared trade-offs across 3 regression models (Linear Regression, Random Forest, Gradient Boosting) in a Python/FastAPI ML pipeline, benchmarking by R^2 score to justify final model selection
- Containerized the full stack with Docker Compose for a one-command, reproducible deploy

REDLINE – AI Co-Driver for Driver Stress Detection (Hackathon)

Aug 2026

Python, FastAPI, HuggingFace (Whisper, wav2vec2), TypeScript, React – [GitHub](#)

- Led a 2-person team as ML/backend lead at a 48-hour virtual hackathon, coordinating model integration and task ownership between teammates
- Built a Python pipeline transcribing live audio (Whisper) and cross-checking vocal-stress classification (wav2vec2) against transcript sentiment for real-time driver-state detection; analyzed results and presented the system to hackathon judges

TECHNICAL SKILLS

AI / ML & LLM: PyTorch, HuggingFace Transformers, LayoutLMv3 (fine-tuning), Scikit-Learn, LangChain, LLM API Integration (Groq/Llama 3), Document Extraction Pipelines, Prompt Engineering, Agent-style Async Orchestration, Model Evaluation & Error Analysis

Languages: Python, TypeScript, JavaScript (ES6+), C++, Java, C, SQL

Backend & APIs: Python, FastAPI, Node.js, TypeScript, Express.js, REST API Design, WebSockets, JWT Authentication, Async Job Queues (BullMQ/Redis), Microservices

Databases & SQL: PostgreSQL, MySQL, MongoDB, Relational Schema Design, SQL Query Writing

Tools & DevOps: Git, GitHub, GitHub Actions (CI/CD), Docker, Docker Compose, Postman, VS Code

Core Competencies: Data Structures & Algorithms, System Design, Model Evaluation, OOP, Debugging, Technical Documentation, Cross-functional Communication, Requirements Analysis

ACHIEVEMENTS & CERTIFICATIONS

- Built and deployed 6+ full-stack products with public GitHub repos and live demos
- Selected Participant, [Amazon ML Summer School 2026](#) – national program in applied machine learning and deep learning
- Codeforces Specialist (max rating 1421), Rank 298/29960 in Codeforces Round 1102 (Div 2); CodeChef 3-Star, Rank 213 in Starters 340B; LostCode Knight (1022) – 800+ DSA problems solved
